## DESIGNER SOLUTION

FUNCTIONAL, STURDY & DECORATIVE CONTAINER

*"This container has positively impacted my business in the form of customer satisfaction. The appearance and the initial reaction are always positive."*

**-Marie Majusiak**

Owner of Watertown Flowers, Inc.  
Watertown, SD

### For Weddings

"You get a very upscale appearance with this container. The 80/81 Designer Urn is perfect for non-traditional European and large arrangements which are about increased height and increased size. The container provides the stability needed to design a taller, even more impressive arrangement. There is an assurance that this container is made well, won't leak and is easy to transport. It is a reliable event container."

### For Sympathy

"Gone are the days of paper mache, and the assumptions that you have no other options. The 80/81 colors are neutral, matching any décor, coordinating well in all places from viewing to chapel.

It is leak-proof and easy to carry which makes it a great sympathy container. Funeral Directors appreciate the reliability and ease of transportation."
